MAXIMA, a member of MIT group, is the leading brand in Chinese commercial vehicle maintenance industry and one of the largest auto-body repair equipment production base, whose production area is 15,000 m² and annual output is more than 3,000 sets. Its production line covers heavy duty column lift, heavy duty platform lift, auto-body alignment system, measurement system, welding machines and dent pulling system.

Customer-oriented MAXIMA heavy duty lift is broadly used in different auto factories, commercial vehicle maintenance stations and special vehicle service industries, sold to USA, Canada, Australia, United Kingdom, France, Netherlands, Spain, Norway, Portugal, Austria, Switzerland, Russia, Brazil, India, Chile etc. In 2007, MAXIMA heavy duty lift was certified by CE. In 2015, MAXIMA heavy duty lift was certified by ALI, becoming the first ALI approved heavy duty lift manufacturer in China. Those certificates enhance customer confidence and help MAXIMA to serve domestic and abroad customers.

MAXIMA owns the unique Automobile Collision Maintenance and Measurement Equipment R&D Center with most capable R&D center and competitive auto-body repair data center. Besides, MAXIMA also has the most advanced and largest auto-body repair training center. Equipped with domestic leading production line, inspection equipment, powerful R&D capability, high-qualified staff and perfect systems, controlling production, quality, sourcing and sale service.

As the world-leading expert of commercial vehicle repair solution and accident vehicle repair solution, MAXIMA will provide safe, professional and advanced equipment and tools, help customers to solve problems, increase efficiency and reduce labor intensity.
